

[finn]

...combines stylish art deco with functional refinement.

The adjustment options are as flexible as they are technically robust and **durable**. »finn« has folding headrests. The model can also be fitted with a **motor-driven** extension that quickly transforms the seat into a lying surface. Optional LED-lighting in different colours shows off the model spectacularly. Design: Wilhelm Bolin

Cover: Z69/95 anthracite

## Order information

### LED-lighting:

The LED-lighting is fixed at item's the lower front. At the one arm chaises and corner sofas it is fixed on the lower connecting side as well as on the enlarged seat/on the footstool. The footstools and armchairs don't have LED-lighting. At the left lower front of the furniture there is a motion sensor that turns the light on or off. The LED-lighting is available in the colours white daylight, warm white or blue.

**Please indicate the colour when ordering!**

### Extendible lying surface:

The sensor touch button for the motorized seat extension is located in the middle under the back cushion.

### Solid wood side part frame:

Wood is a long-lasting natural product. Different colours at the massive wooden parts may occur and are a special characteristic of this product. Massive wood cannot be processed with a regularly appearance. Differences between colour and structure cannot be avoided and do not authorize a complaint.

### Back sides of sofas:

All pieces are genuinely upholstered at the back.

### Positioning diagram:

Please send us a positioning diagram, because of the many different variations available. We have marked the connecting sides in red for end elements in the type guide.

### Connecting sides:

For an extra charge, the connecting sides can be supplied in the original cover instead of stretch fabric. See opening paragraph for prices.

### Seam appearance:

Decorative, felled or double seams may appear different in fabric or leather versions. For manufacturing reasons, seams may be left out of the fabric version or replaced with simple seams.

### Contrasting thread:

In some leather colours, this model can be supplied with contrasting-colour thread, at no extra charge. The colours as given can be found on the leather wal in the

studio. Please always specify the contrasting thread number or tonal colours will be supplied.

### Recommendation:

We recommend the tables from the model range 10012 as accessories, as well as the individual armchair »misterX« 17750. As storage place onto the footstools we recommend a roll mat from model range 10006.

**All of the dimensions given are approximate dimensions in cm. We reserve the right to make changes. Dimensions are given as follows: width/depth/height/seat height.**

Seat depth: ca. **56 cm**

Seat depth with function extendible lying flat surface: ca. **76 cm**

Total height if back is up: ca. **90 cm**

Total depth if seat is extended: ca. **126 cm**

### Crease formation:

Fabric and leather stretch to a lesser or greater extent under the influence of body weight, which can lead to the formation of creases in the cover. This visual change does not affect use, function and life span and it is not a defect.

## Special features

### Flexible back support

The items can be equipped with a step-by-step headrest function for extra charge (except armchair ME 55). Item no. = KV1, KV2, KV3.

### Extendible lying surface

Some items can be fitted with the seat extension in return for an extra charge. The sensor touch button is located in the middle under the back cushion. Item no. = A02.

### LED-lighting

Every item (except footstools and armchairs) can be equipped with a LED-lighting at the bottom. It is available with the colours white daylight, warm white or blue.

### Noble side part frame

The side part frame is available in massive wood in oak or walnut. Also available is a metal frame in high-gloss chrome or matt design.

## Order checklist

- Structure and cover
- Flexible backs
- Side part frame design
- Castors for footstools (extra charge)
- Footstool panel (order information)
- Motorized extendible lying flat surface (extra charge)
- LED-lighting white daylight/warm white/blue
- Contrasting thread
- Positioning diagram

## Upholstered furniture frame structure

1. **Frame** - Beech wood structure
2. **Seat suspension** with permanently elastic wave springs
3. **Seat upholstery structure** – spring core with diolen cover incorporated into **ergo**-PUR-foam
4. **Back suspension** with wooden board
5. **Back upholstery structure** of **ergo**-PUR-foam with diolen cover

The design of the cross section shown here does not correspond to the model on this page of the catalogue.

## Upholstered furniture made with passion.

Your model is the product of German design and engineering. Family firm W.SCHILLIG has over 65 years' experience of technical skill, trend-setting ideas, attractive design and know-how from Germany. The result is upholstered furniture that guarantees first class comfort and attention to detail. We keep sustainability and protection of resources in mind when choosing the materials we use.

- Controlled Quality
- Guaranteed Safety
- Healthy Living

...represented by this label

The RAL quality mark for furniture stands for the certain knowledge that this is a non-hazardous piece of furniture of reliably high quality and with an attractive design. The Deutsche Gütegemeinschaft Möbel makes sure of this with numerous tests. Inspections also safeguard the testing system.

In-house manufacture conforming to the specifications of the quality management system in line with ISO 9001, to safeguard internal processes.

The highest European accolade for systematic, in-house, environmental management. Concrete improvement of environmental protection services, tested adherence to legislative provisions and transparency that everybody can understand through environmental reporting.

Designates a fair company that manufactures sustainable products. A fair way of working with nature and natural resources, with society, employees and business partners. Consciously environmentally friendly and resource-sparing manufacture of products.
